

**International Society of  
Dynamic Games (ISDG)  
- China Chapter Conference  
on Dynamic Games and  
Game Theoretic Analysis**

## Organizers :

School of Economics (University of Nottingham Ningbo China)  
ISDG-China Chapter ( 国际动态对策学会中国分会 )

**Date:** 3-5 August 2017

**Venue:** The University of Nottingham Ningbo China

### Topics of interest include, but are not restricted to:

- Dynamic games and applications in computer science, economics, finance, management, marketing and operational research, environment, energy and resource management, biology and social sciences
- Static games and its applications;
- Repeated games;
- Epistemic game theory;
- Games under Incomplete Information;
- Auction Theory;
- Stochastic games;
- Learning and adaptive games;
- Mechanism design;
- Evolutionary games;
- Cooperative games;
- H-infinity control and robust controller designs;
- Theory of optimal control and dynamic games ;
- Numerical methods and computer implementation of game models;

- Dynamic bargaining;
- Pursuit-Evasion games;
- Search, encounter and inspection games.

### Plenaries

- David Yeung: Distinguished Research Professor at the Hong Kong Shue Yan University, Director of the SRS Consortium for Advanced Study at the Hong Kong Shue Yan University, Co-director of the Center of Game Theory and the Kantorovich Research Chair in Stochastic Differential Games at the St Petersburg State University.
- Georges Zaccour: Professor of Decision Sciences & Chair in Game Theory and Management at HEC Montréal in Canada.
- Leon Petrosjan Professor of Applied Mathematics and the Head of the Department of Mathematical Game theory and Statistical Decision Theory at the St. Petersburg University, Russia
- Shmuel Zamir: Professor at the Center for the Study of Rationality, The Hebrew University in Israel.

### Abstract Submission

BEFORE May 1, 2017.

### Venue

New Teaching Building (NTB),  
199 Taikang East Road,  
The University of Nottingham Ningbo China
