Mathematical Finance Workhop

Atelier en finance mathématique

1 - 2 mai 2013

Lieu / venue: HEC Montréal

Animateur / leader:

Nabil Tahani, York University

The language of the workshop will be English

This workshop is intended for MSc and PhD students in financial engineering or quantitative finance.

Topics covered include:

- stochastic volatility
- GARCH models
- change of measure/numeraire
- characteristic functions
- inverse Fourier transform
- Feynman-Kac theorem
- Gaussian quadratures
- Taylor/Edgeworth expansions
- Applications to personal finance.
