

Postdoctoral Research Fellow Opening at HEC Montréal – Position1

There is a postdoc position opening at HEC Montréal to work on **Integrated Logistics Network Design Problems** with our industry partner **Hydro-Québec**. The supervisors are Yossiri Adulyasak, Okan Arslan and Jean-François Cordeau from HEC Montréal. This position is for one year (with a possible extension for a second year). The starting date is as soon as possible.

Interested applicants with a strong mathematical optimization background and coding skills are encouraged to apply. Prior exposure to network design problem and optimization under uncertainty are plus. Applicants should have obtained their Ph.D. within five years before the starting date in a field closely related to the scientific content of the position. The deliberations will be done on a weekly basis until the position is filled.

We are strongly committed to the equity, diversity and inclusion principles and offer a competitive salary for this position. Interested candidates are welcome to contact Okan Arslan for more information. Please submit your applications at the earliest convenience to yossiri.adulyasak@hec.ca, okan.arslan@hec.ca and jean-francois.cordeau@hec.ca with

1. a cover letter (at most two pages) with a brief research statement indicating your knowledge and experience in modeling and algorithm development,
2. an up-to-date curriculum vitae (CV) including
 - the level of programming skills,
 - experience with CPLEX or Gurobi,
 - names and email addresses of three potential referees and
3. one research manuscript.

We thank all applicants for their time and interest.
